

# Quality Management System

JTS Engineering is dedicated to maintaining a rigorous Quality Management System (QMS) to ensure the highest standards of quality, consistency, and client satisfaction in our operations. Our Quality Management System is aligned with industry best practices and international standards. Here is an overview of our Quality Management System:

## **Quality Policy:**

We have established a Quality Policy that reflects our commitment to delivering high-quality products and services. This policy is communicated throughout the organization and to all stakeholders.

**Leadership Commitment:**

Senior management is fully committed to quality and actively engages in setting the strategic direction for our QMS. They provide leadership and support for the QMS's implementation and improvement.

**Process-Based Approach:**

Our QMS follows a process-based approach. We have identified and defined key processes within our organization to ensure consistency and effectiveness.

**Client Focus:**

Client satisfaction is our top priority. We understand and meet our clients' needs and expectations, ensuring that our products and services are of the highest quality.

**Continuous Improvement:**

We have established a culture of continuous improvement. We regularly assess our processes, products, and services to identify areas for enhancement.

**Risk-Based Thinking:**

Risk assessment and management are integrated into our QMS. We identify and mitigate risks that could affect the quality of our products and services.
